SYLK

Natural lubricant extracted from the Kiwi plant.

Application:

For vaginal dryness and better arousal. Recommended to use while times of lactation, menopause or stress, or to insert tampons, thermometers, etc. May avoid fissures and risk of infections. SYLK may be used with natural latex rubber condoms and silicon devices.

Contraindication:

Not recommended to be used while period of ovulation for couples that try to conceive.

We recommend **Pre-Seed®** lubricant – fertility friendly. Especially designed for try to conceive couples.
