Premeno[®] duo

Vaginal ovules for vaginal dryness

The hormone free medical device Premeno[®] duo is the first ovule that both regulates the moisture balance of the vagina and restores the natural pH for defence against infections.

Uses:

The menopause, cancer treatment or even factors such as stress or changes in oestrogen production can cause vaginal dryness. This, in turn, can lead to burning, itching or pain during intercourse.

Thanks to the hyaluronate it contains, Premeno[®] duo regulates vaginal moisture and prevents further infection by restoring the vagina's natural (and slightly acidic) pH balance.

Properties:

- Hormone free
- Increases moisture
- Promotes wound healing
- Tasteless and odourless
- Free of preservatives, parabens additional plant based substances
- Low side effect potential

Use:

- **For the treatment and prevention of dry vaginal skin:**
1x daily to 1x every 3 days
- **For bacterial vaginal infections:**
Initial dose: one ovulum before bedtime for 10 days
Maintenance dose: one ovulum every 3rd day for as long as required

Ingredients:

One ovulum contains 5mg hyaluronate and a combination of lactic acid and sodium lactate

For further information go to www.premeno.de

Available in pharmacies, specialised shops or via KESSEL MEDintim.

Contents:

10 Ovules (suppositories)	3 x 10 Ovules (suppositories)
